ENVIRO 200P ULTRA

ULTRA-FLEXIBLE MODIFIED POLYURETHANE WATERPROOFING MEMBRANE

Enviro 200P Ultra is an ultra flexible, fast drying, class III waterproofing membrane specifically designed for internal and external use under tiles and for a range of water tank applications. It is formulated on a water-based crosslinked copolymer system that is urethane modified.

KEY BENEFITS

- ✓ Single component fast drying water based system with a very low VOC content
.....
- ✓ Complies with AS:4858
.....
- ✓ Excellent vertical hold up and crack bridging ability - no reinforcing fabric required
.....
- ✓ Modified polyurethane eliminates re-emulsification and exhibits excellent adhesion
.....
- ✓ Australian Made & Owned - this solution was designed in-house and manufactured locally
.....
